PULP & PAPER INDUSTRY SOLUTIONS

RELIABILITY, COSTEFFICIENCY AND EXCEPTIONAL PERFORMANCE. IT'S WHAT WE DELIVER.

In the pulp and paper industry, varied processes use aggressive liquors, abrasion, and impacts that put a strain on equipment and structures. A humid environment invites corrosion and can make maintenance an extremely difficult task. In-service failures caused by these problems can lead to major maintenance headaches and increased operational costs.

Atlas understands these challenges, so we provide reliable, cost effective and easy-to-use solutions that help you repair, protect, and maintain your equipment. We help you keep your equipment running longer, more efficiently, and more safely.

OUR SPECIALLY FORMULATED MATERIALS PROTECT YOUR EQUIPMENT

- Get extreme resistance to humidity and corrosion
- Defend equipment against aggressive chemicals, extreme impact, and abrasion
- Maximize your equipment uptime, efficiency, and safety
- Decrease labor and replacement costs
- Quickly return equipment to service

HIGH VALUE AND OPTIMAL RESULTS FOR PULP AND PAPER APPLICATIONS

- Floors, walls and roofs
- Pipes, sumps and drains
- Grip rollers
- Fans, blowers and compressors
- Pipes, sumps and drains
- Fluid handling equipment
- Chemical containment areas

ATLAS
POLYMERS

ADDITIONAL AREAS WHERE PROTECTION IS OFTEN PROVIDED:

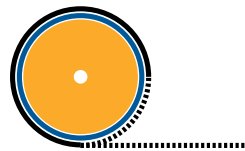

PULP HANDLING SYSTEMS

- Stock chest repairs
- Pulp mixer repair and protection
- Eroded fans and blowers
- Worn pipe bends, chutes and hoppers

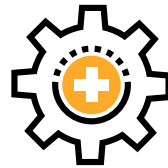

FLUID HANDLING EQUIPMENT

- Pump repair and protection
- Stuffing box repair
- Delivery tube protection
- Heat exchanger repair and protection
- Vacuum pump repair and protection

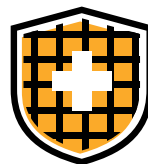

LUMBER TRANSFER SYSTEMS

- Roller impact repair
- Roller grip repair and restoration

GENERAL EQUIPMENT REPAIRS

- Eroded fans and housings
- Manhole filler installation
- Metal corrosion protection
- Freeze-thaw damaged concrete

FLOORS & SAFETY

- Step safety grip systems
- Ramp safety grip systems
- Loading dock safety grip systems
